Neck collars · 90 × 14 mm

How to make a real-life sample

- 1. Print both pages at 100% / "Actual size" (not "Fit to page"). Check: each label measures 190 mm wide.
- 2. Best paper: matte or textured sticker paper (A4 label sheets). Plain thick matte paper + glue stick also works.
- 3. Cut exactly on the crop marks. The coloured edge outside the marks is bleed and is cut off.
- 4. Fill a clear 500 ml glass longneck with juice. Wrap the label with its bottom edge about 17 mm above the base, front panel facing you. The ends leave a small gap at the back.
- 5. Wrap a collar tightly just under the cap, mark centred at the front; overlap the ends at the back.
- 6. Photograph by a window in daylight, front-on at label height, plain wall behind, no flash.

Send me the full-size photo and I can clean it up and add the other flavours.
